

ADELL DURBIN PARK & ARBORETUM

Tree & Shrub (Yellow) Trail Guide

The following trees have been tagged with numbers and can be found in the areas indicated on the map inside. Many of the same trees are found along different parts of the trail, but are not tagged. Some of these are marked on the map with the tagged tree number followed by a U for "untagged." The small aluminum tags are located approximately seven feet above the ground. At this time only odd numbers have been used. In the future many shrubs and flowers found along the trail will be added to the map. Please take your time to enjoy the many native and cultivated trees on this one mile trail.
